Automatic Exchange Rates Computations:

ForexBoard has an option to turn on Automatic Exchange Rates computation, with hourly updates. The currency rates are taken from <https://openexchangerates.org/> Each currency can be individually set to manual update or to auto update.

There are 2 ways of auto updating the currency rates:

1

Auto update the currency rates by adding / subtracting a fixed amount to the current exchange rate.

Please note you will need to select the correct Base Currency under Settings for the auto update rates to work correctly.

Manual Update Auto Update

Buy:	61.86
Sell:	67.68
Buy:	Subtract 5.58 = 61.0834
Sell:	Add 6.85 = 73.5134

2

Auto update the exchange rates by multiplying a decimal value to the Buy / Sell rates. Again please note you will need to select the correct Base Currency under Settings for the auto update rates to work correctly.

Manual Update Auto Update

Buy:	61.86
Sell:	67.68
Buy:	Multiply 0.88 = 58.6638
Sell:	Multiply 1.12 = 74.663

Please note automatic Rates updates can be turned on for your account with a one-time activation fee, please contact us support@forexboard.app for this.
